

Surveon Makes the Differences in Bank Surveillance

Banks are the places not only giving customers promising futures but also potential risks whenever transaction is undergoing. With the advanced technology, banking security has become more challenging under different operation circumstances, such as ATMs, personal visit to branch offices or self-service banking station. A well-integrated and reliable surveillance solution will help secure customers' financial assets and safety for all people in this environment in every aspect.

When designing a suitable surveillance system for the industry, we might encounter some challenges:

Reliability for Cameras

Banks require the solution provides sufficient reliability for long-term operations. Besides, the cameras have to support clear images with high quality, regardless of different kinds of environments or applications.

Well Protect Video with Mask & Watermark Functions

Surveon provides video protection mask and watermark functions, offering higher values for privacy and authenticity needed for banking application.

Long-time Storage

Provide large capacities for 1+ year non-stopping recording.

Recorded Video Data Retention

The data retention of recorded video is particularly important to the planning and acceptance of bank security projects.

CMS & Remote Monitoring

With the Surveon Control Center (SCC) remote monitoring and centralized management, bank operations become easier and surveillance costs can be reduced.

Reliable Compact Cameras

Surveon compact series camera provides excellent megapixel image quality even under complex light conditions, protecting banks and ATMs from potential threats.

Solution Scalability

Banking security often requires a distributed structure with centralized management. In addition, the solution has to be scalable, enabling customers to add cameras at individual locations or expand the coverage of the solution to include even more locations.

Zero Video Loss with Failover & Backup System

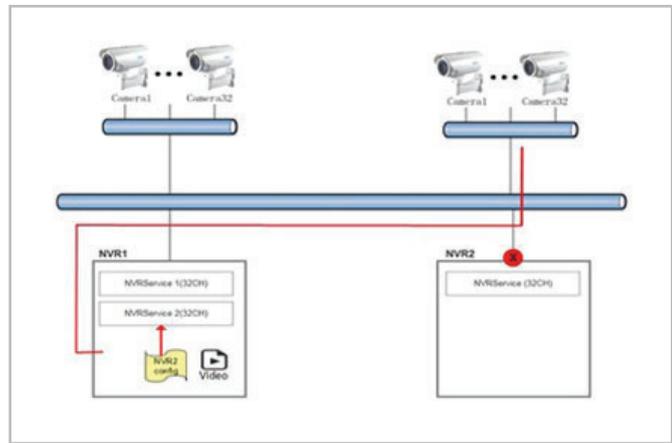

Without using spare NVR, Surveon Failover solution allows failover NVR to work normally and only use failover licenses to take over recording from the failed NVR when needed, ensuring no video loss for mission-critical applications like banking surveillance.
