Chapter 1. Installing and Starting the SPhone Client on Android Devices

1.1. Installing the SPhone Client

Download the SPhone Client from App Store on the Android phone desktop.

1.2. Starting the SPhone Client

Note: Please check the web server settings in the VMS Setup first.

After the SPhone Client installation is done, a login window will pop up.

- **Server Name:** The VMS/SMR Server Name
- **Address:** The IP address for the VMS/SMR Server.
- **Port:** The login port for SPhone Client. Default port number is *80*.

Note: The port number should be the same with the web server port.

- **Username** - The username for the domain. Default username is *admin*.
- **Password** -The password for the domain. Default password is *admin*.

Click **OK** icon after the port, username and password are entered.

1.3. Checking the Software Version

Users can see the software version. Tap on the About Us on the upper right corner of the window after logging in.

1.4. Functionalities on the SPhone Client

Live View

After logging in, you will see the Live View images. The default is 6 channels per page.

At most 6-channel live view can be displayed in the same page.

You can click on any channel you'd like to see or manage to have a single view on your device.
