

EMR8000U

Professional Megapixel HW RAID NVR

Certified Megapixel Recorder

- Optimized Hardware RAID for Megapixel Recording
- Support 8 Hot-Swappable Hard Drives
- High Availability and Easy Maintenance with Redundant Modules
- Built-in D-Sub/HDMI for VGA Local Display
- In-house Design and Production with 3 Years Warranty
- Surveon Megapixel Quality Assurance Lab Certificated
- Pre-load Certified VMS

Megapixel solutions are the key trend in video surveillance with the advanced benefit of 6-time better image clarity. However, high I/O, huge capacity, and stability of the overall system are major challenges for system integrators. Surveon's Certified Megapixel Recorders, allied with the most qualified partners in the industry, provide a high performance and reliable platform. Built-in with the HW RAID, the EMR8000U secures the multi-channel megapixel recording performance. The industrial grade design of 8 HDD, duo display, and 2 GLAN have made EMR8000U an absolute choice over the commercial PCs and the ideal solution for mission critical projects, such as hotel, school, bank and factory.

Performance Validation

Model	Total Channels	Camera Resolution	Camera Compression	Camera Bit Rate	FPS	Smart Client View Mode	Validation*
EMR8008U	8	1080P	H.264	6Mbps	25	Medium	PASS
EMR8016U	16	1080P	H.264	6Mbps	25	Medium	PASS
EMR8032U	32	1080P	H.264	6Mbps	25	Medium	PASS
EMR8040U	40	1.3M	H.264	6Mbps	25	Medium	PASS
EMR8048U	48	1.3M	H.264	6Mbps	25	Medium	PASS

*Remarks:

- Tested with Milestone XProtect® Enterprise.

- RAID 5 rebuild and degrade mode will decrease the recording performance depending on the number of channels.

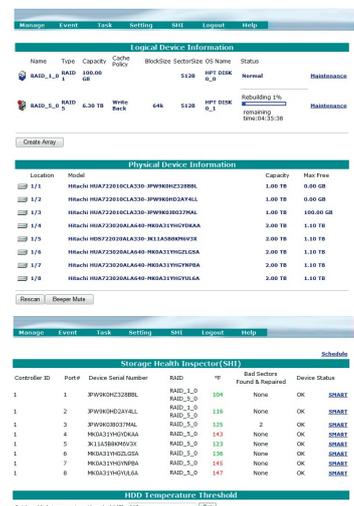

Recording Days

Number of Channels	2M Cameras*	Max Recording Days (12 hrs/day)	Max Recording Days (24 hrs/day)
48	1920 x 1080	13	7
32	1920 x 1080	19	10
25	1920 x 1080	25	12
16	1920 x 1080	39	20

* Base on 25 FPS @ 6 Mbps - Tested with Milestone XProtect® Enterprise.

EMR Hardware RAID Management

- **High Reliability RAID Protection** -the VMS and record data can protect with RAID to provide the maximum reliability for the 24/7 application.
- **Event Notification** - the EMR RAID system will record Administrator activity or RAID related errors to the Web GUI's Event Log. This feature allows the administrator to track and diagnose storage related problems. The Web GUI can also be configured to send event log data via e-Mail.
- **Maintenance Tasks** – the Web GUI allows the administrator to schedule regular maintenance sessions. Routine RAID Maintenance is essential to data security.
- **Rebuild Priority** – this feature allows the administrator to control and streamline system resources during a RAID recovery procedure.
- **Storage Health Inspector (SHI)** - the Storage Health Inspector section provides real-time device related information including temperature readings, bad sector counts, and access to SMART data.
